Free Online Computer, Math, and Life Skills Training Available

GCFLearnFree.org® is an online training program that provides fundamental computer, math, and life skills training to help adults improve the quality of their lives. The program is administered by the Goodwill Community Foundation, Inc. ("GCF"), an NGO operating out of the United States that supports a number of international organizations, including many in Africa.

Training topics include computer basics, Internet/Email, Microsoft Office, math and money, career development, a variety of life skills, and more. Learners can develop their skills through self-paced tutorials, interactive lessons, and instructor-supported classes.

Self-paced tutorials allow users who want to learn at their own pace the opportunity to complete lessons, challenge activities, and practice quizzes independently, as well as track their progress and quiz results. Our Everyday Life lessons give learners the opportunity to develop functional literacy and communication skills through interactive, real-world scenarios without the fear of real-world consequences.

Three-week, online classes offer users the opportunity to learn with the support of an instructor in an online class environment. Class participants complete lessons and assignments, and have the option of communicating with their instructor and peers via a class discussion board. In addition, learners can earn certificates of completion and Continuing Education Units (CEUs) which are accredited through the International Association of Continuing Education and Training (IACET).

Although the content was originally designed for US learners, the curriculum can be used by global audiences. To date, GCFLearnFree.org has served over 400,000 people from over 230 different countries around the world. In 2007, we had over 120,000 users, with 6,500 from Africa.

GCFLearnFree.org gives you the freedom to learn what you want, when you want, absolutely free. To see why learners across the world use our curriculum, visit www.GCFLearnFree.org today.
