

Experiential Technologies is an international recognised training and development organisation, providing an integrated human resource and organisational development process through blended learning.

We work with leaders in organisations to increase productivity and improve business performance by amongst other activities engage in the use of interactive simulations.

A blended learning solutions approach is followed to deliver targeted learning to appropriate audiences, providing people with the skills and knowledge to contribute to the success of business initiatives.

Experiential Technologies’ mission is to help clients improve their overall business performance and long-term success by enhancing business skills, knowledge and competencies of their executives, managers and professionals and to be the number one training technology and business simulation Solutions Company in peoples minds. Individuals can log onto an e-learning resource whilst experiencing a caring mentoring relationship facilitating holistic development of the individual and the organisation.

The e-learning tool known as Knowledge Presenter Professional 2007 is being used. A powerful set of tools that assists educators and trainers to create high-quality, interactive e-learning and multimedia presentations- for online or offline delivery. HR Departments deploying discrete e-learning, Schools and colleges introducing e-learning, Universities complementing face to face learning, Training Centres, and registered providers can benefit from it

The following outcomes can be met by using the Knowledge Presenter tool:

- Localised training, support and implementation of the product.
- Creation of Interactive Company / Departmental Inductions, Software Simulations, Product Launches / Awareness....
- Easily monitoring and extraction of either individual, departmental or an entire organisation’s performance in just a few clicks.
- Quickly and easily creating, managing and extract results for Online Polls, Surveys and Quizzes.
- Making lessons available to any person in any location at any time.
- No outside contractors being required for development or administrative Intervention.
- Customising and tailoring lessons to suit your audience and environment.
- Refection even over slow bandwidths.
- Friendly and easy to use front end. Perfect for both beginners and experienced developers.
- Both singular and multi-developer environments.
- Total learning collaboration, including SKYPE integration, blogging and live chat.

Dr Marina le Grange from Experiential Technologies will do a presentation at the eLearning Africa conference on 29<sup>th</sup> May 2008. She will be sharing experience on **how to design and use simulations to enhance learning**. Theoretical knowledge will be encompassed by practical experience in this regard in the the environment of training, recruitment and assessment.
